

# Regional Overview & Economic Indicators

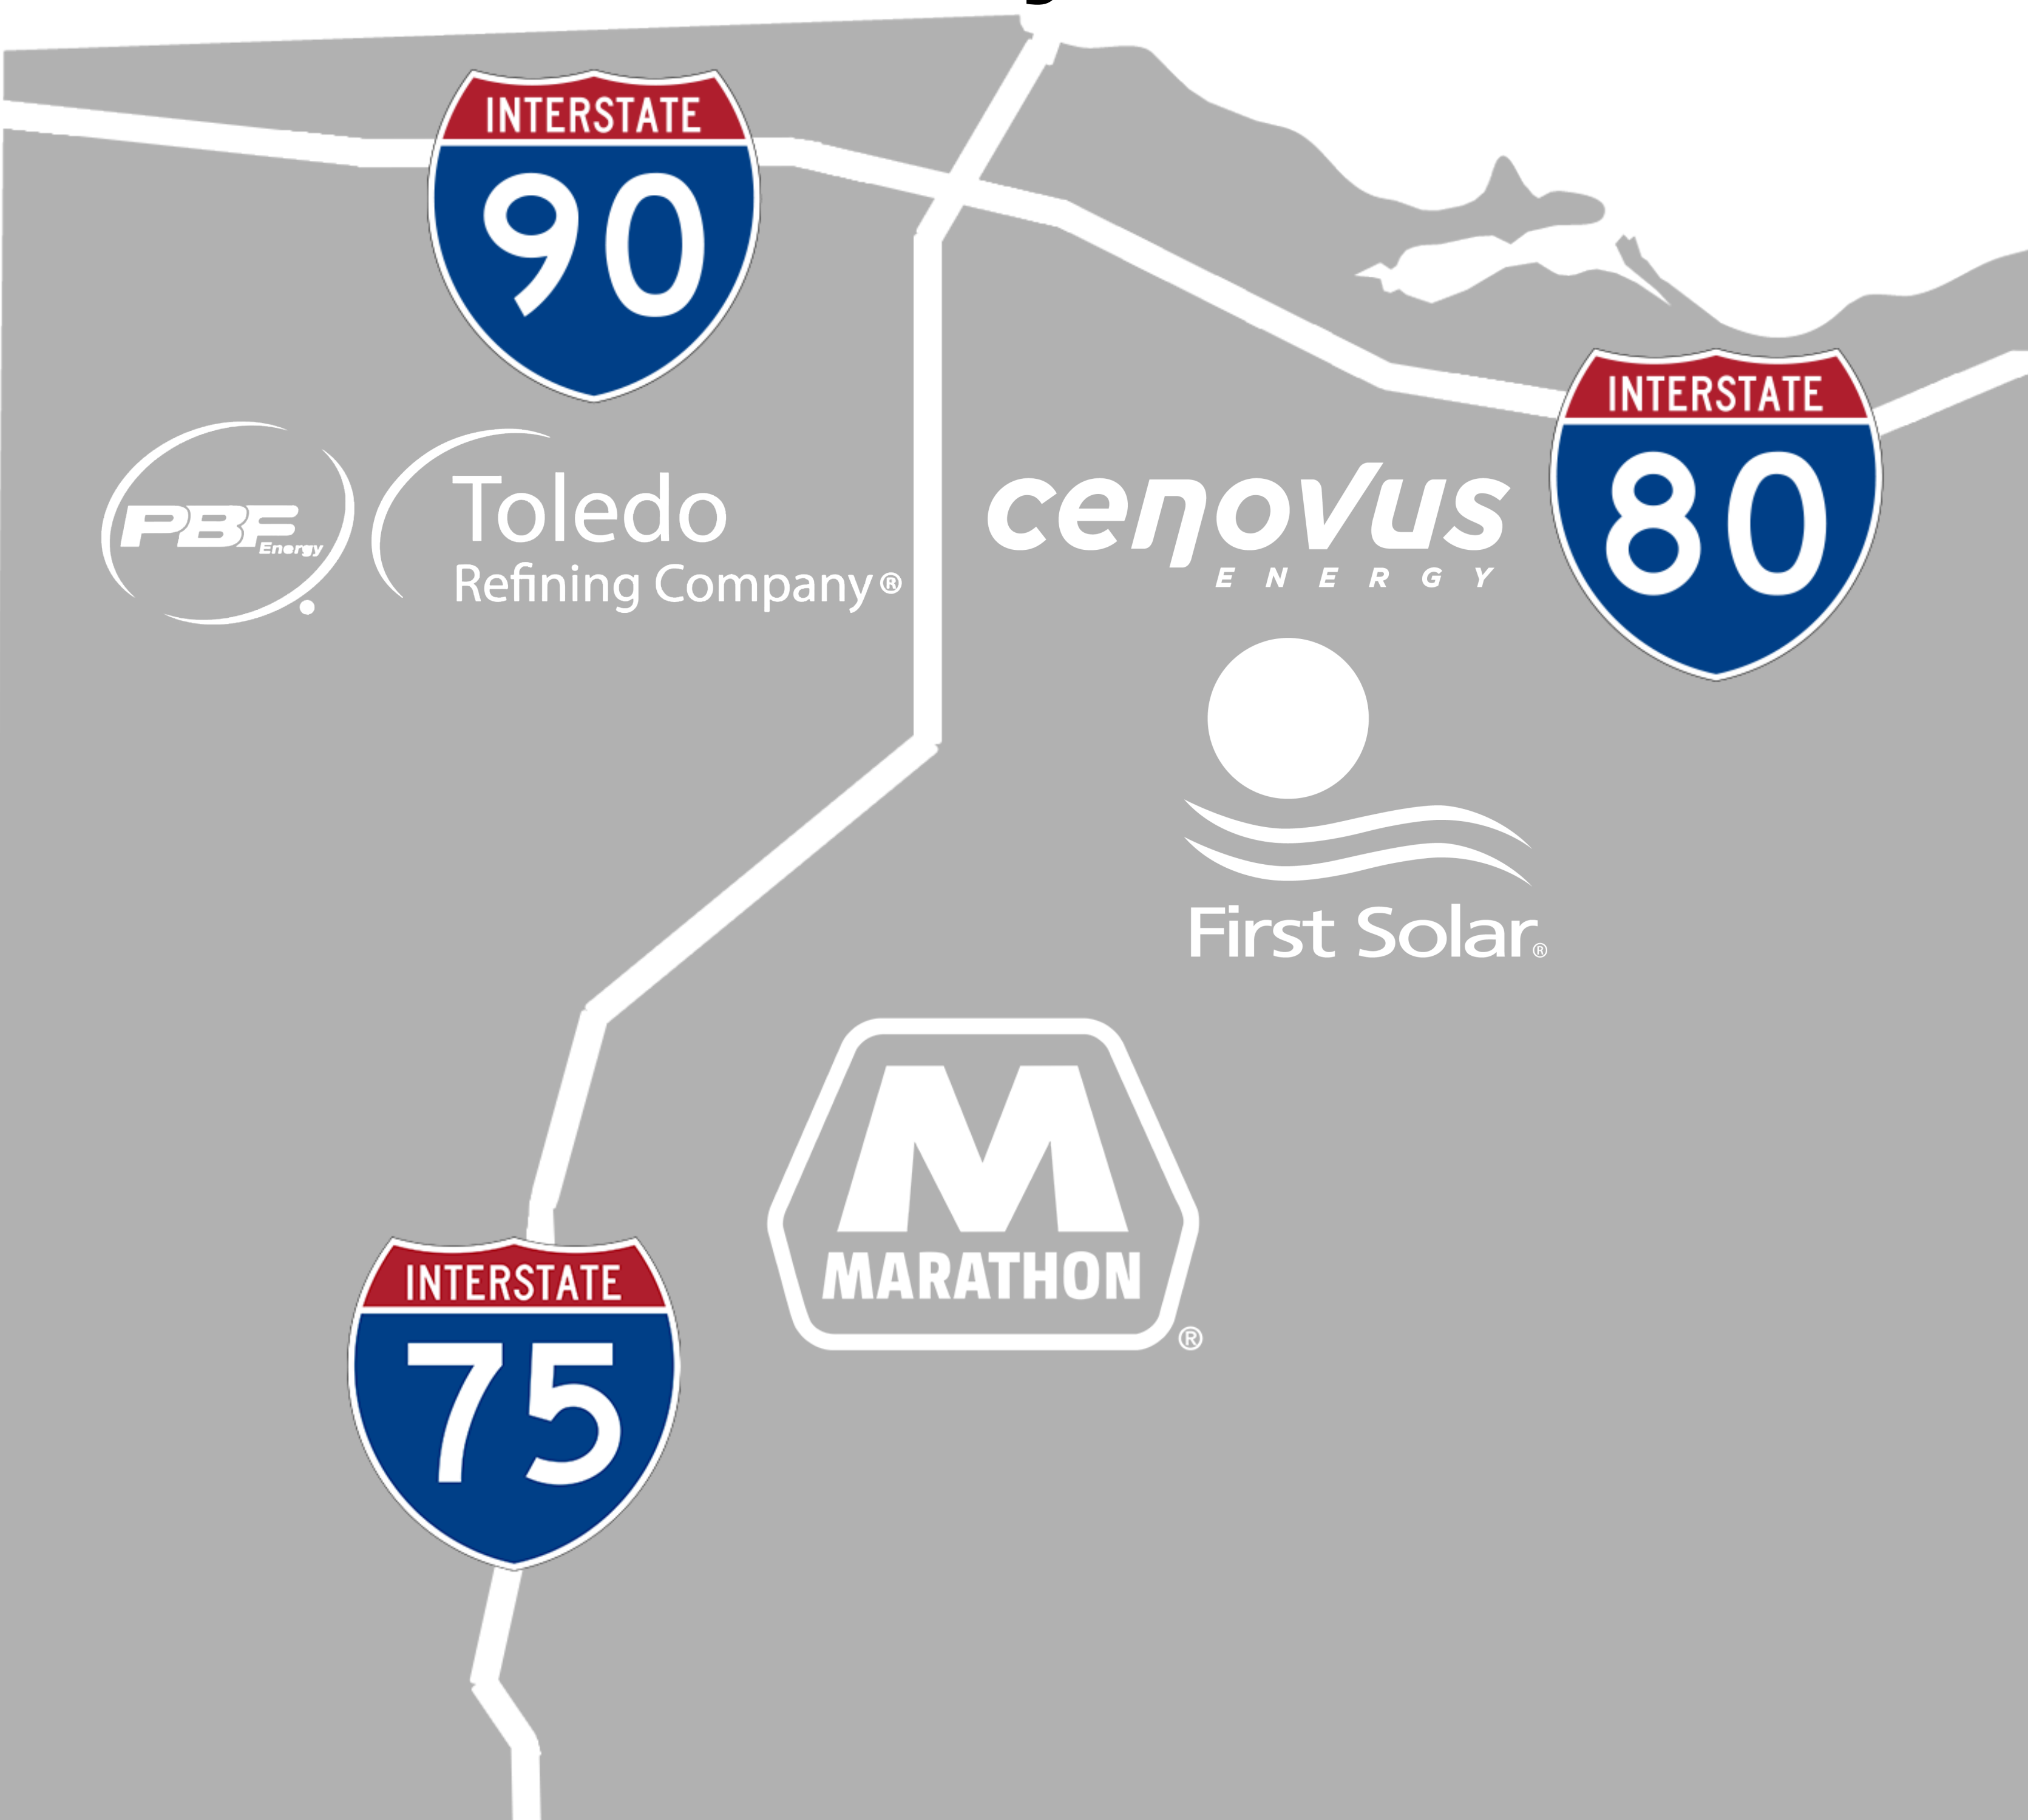

## Energy

For companies that use, produce or support the energy industry, Northwest Ohio is a top location for business. In the 17-county region, Northwest Ohio produces nearly every form of energy, including natural gas, petroleum, solar, wind, biofuels and nuclear. This region is adjacent to an incredible amount of energy reserves in the Marcellus and Utica Shale plays. And we combine that with an extensive transmission pipeline network running through this region which connects us to the traditional hotbeds near the Gulf of America, the growing supply in the Dakotas, and the oil fields in Canada.
